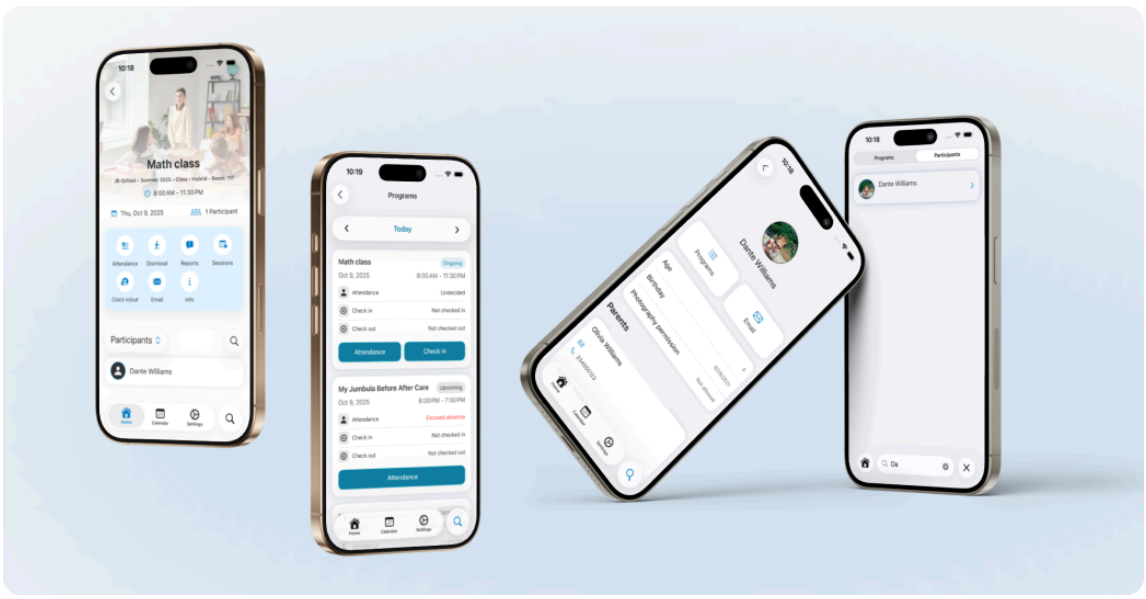
👨‍👩‍👧‍👦 Jumbula WebConnect Support on My Jumbula Android

In the latest release of the **My Jumbula Android**, we've added support for **Jumbula WebConnect**. You can now show your programs directly through the app, and when families choose to register, they'll be taken to your website to complete their enrollment.

👩‍💻 Jumbula for Business 3.0 on iOS



Jumbula for Business is now fully compatible with iOS 26, featuring a refreshed interface aligned with Apple's new Liquid Glass design. A key addition in this release is the **redesigned Participant Search**, now available in a dedicated **Search** tab, which allows you to switch instantly between **Programs** and **Participants**.

From any participant profile, you can:

- Review medical details, parent contacts, and more
- Email directly from their profile
- View daily schedules
- Update attendance and check-in/out (with permissions)
- Jump to the program screen for deeper insights and quick actions

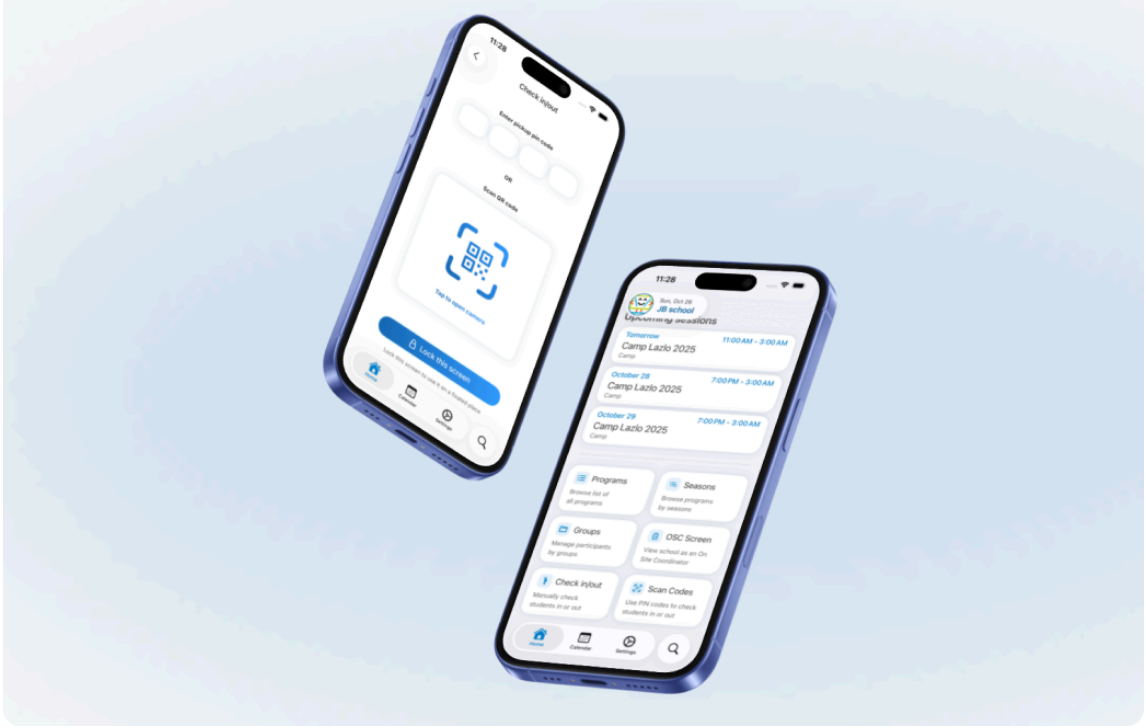
🗓️ Upcoming Features

📱 CICO with PIN & QR code



Soon, admins will be able to manage check-in and check-out directly from the **Jumbula Business app** on iOS, using either a **PIN code** or **QR code**. This update will make attendance tracking faster and more secure — without needing to switch to the web dashboard.

📆 **Expected release date**: November 2025
